# Our Consulting Approach

We are more than a software provider

Continuous support of your operations and maintenance activities

## AMS, more than a software provider

Whether you are an Operator, a CAMO or a Maintenance Center Organization, AMS solutions support your maintenance activities by providing professional services and intuitive software products. We provide customized accompaniment program(s) that best fit your business needs and that answers your day-to-day operational challenges. Leading your team towards continuous improvement and efficient processes is our goal.

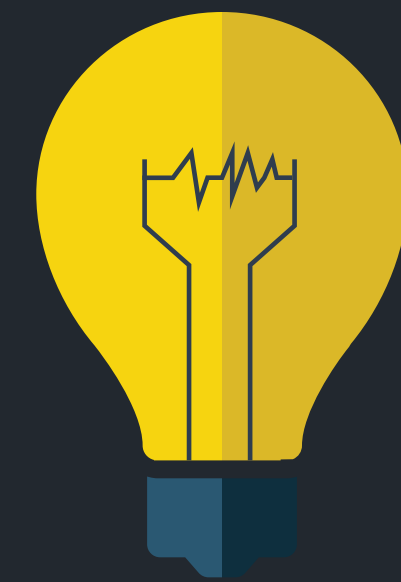

## Leverage our expertise

We understand that every customer requirements and expectations are different. To minimize and avoid technological fractures, we closely monitor and optimize the deployment phase of our solutions. We do so, by preliminary performing a thorough analysis of your specific context and environment.

We believe that training future users is a major contributing factor of a successful implementation and his proven to result in a greater return on investment on your solution(s).

AMS team proficiency represent the right balance of skills and expertise in the following areas::

- Software development
- Aviation maintenance
- Consulting and change management in the aerospace sector

*“Technology is nothing but what we make of it”*

# We support and accompany our users

*AMS System initialization with complete and consistent data*

*Data Migration*

## Plan

*PHASE 01:  
Understand  
Identify  
Analyze*

## Do

*PHASE 02:  
Define and  
implement  
solutions*

*Consulting and specific onsite training*

## Act

*PHASE 04:  
Adjustment  
of proposed  
solutions and  
users training*

## Check

*PHASE 03:  
Check results  
and measure  
improvements*

*Continuous support post and Go-Live*

# Leverage AMS professional services through three approaches

## *Data Migration*

Accelerate the deployment phase of your solution and ensure continuous and coherent management of your information. Let our experts guide you through this phase soundly and with a minimum resources involvement on your end.

## *Consulting and specific onsite training*

Understanding your methodology, identifying areas for potential improvement and assisting you during the implementation phase are the main targets of this approach.

## *Continuous support & Go-Live*

This approach allows you to gain and maintain optimal control and visibility over your data and ensures your users' learning curve nimbly adapt to the improvements input into our products.
